Attendorn Plant

Grown continuously on a sound foundation

With the forming of the family business in 1886, the foundation stone was laid for continuous and positive development of the company. We have made a name for ourselves through our permanent willingness to accept challenges and to market our innovations actively. Today we are one of the leading manufacturers of hot-pressed brass parts. We process high-quality materials, such as copper alloys, aluminium and stainless steel.

Our specializations:

- Hot forged parts
- Machining of hot forged and cast parts
- Surface finishing
- Production of customised components
- Customised final assembly

Suhl Plant

Professionals in precision engineering

Today, Bruse GmbH is regarded as a competent and qualified partner for the production of customised precision turned parts from a large number of materials. The sustained success of our company since its foundation in 1991 has ultimately been characterised by continuous investment, a high level of commitment and the extensive qualifications of our employees as well as comprehensive service.

Our specializations:

- Precision turned parts
- Surface finishing
- Customised component manufacture
- Customised final assembly
- Planning
